TITLE: One-piece pond insert has bottom drain of
basin connected to upper region of pump shaft through
pipe containing pressure pipe to pump water through
gravity to water toy

ABSTRACTED-PUB-NO: DE2004013617U

BASIC-ABSTRACT:

NOVELTY - The pond insert has a separate pond basin with bottom drain and a separate pump shaft with a pump at the bottom and a filter mounted thereabove. The bottom drain (17) of the basin (12) is connected to the upper region of the pump shaft (13) through a pipe (16) which contains a pressure pipe (19) which leads from the pressure connection (18) of the pump to the inlet connection (20) of at least one water toy (22) mounted in or on the basin. The inside

diameter of the pipe (16) is larger than the outside diameter of the pressure pipe.

USE - For pond fountains etc.

ADVANTAGE - Enables gravity to operate the water toy after vertical filtration.

DESCRIPTION OF DRAWING(S) - Figure shows sectional side view of insert

bottom drain 17
